

Gaza Alfath

Full-Stack Developer · Backend Engineer · Python Automation

Bekasi, West Java, Indonesia · gazfath12@gmail.com · gazaalfath.my.id · [GitHub](#) · [LinkedIn](#)

PROFESSIONAL SUMMARY

Full-stack developer with hands-on experience shipping commercial products using **NestJS, Next.js, Node.js, and Laravel**. Built and deployed a live SaaS platform (nexcore.web.id) and architected backend API services for a school management system handling hundreds of student records. Specializes in **Python automation bots, n8n workflow integration, and on-premise LLM deployment**. Proven ability to manage full production pipelines — from backend architecture to Linux VPS deployment and SEO optimization — without senior oversight.

PROJECT EXPERIENCE

SaaS Platform — nexcore.web.id

Full-Stack Developer

- Engineered and launched a commercial SaaS platform end-to-end, covering frontend, backend API, and production deployment on a self-managed Linux VPS.
- Achieved consistent uptime with zero-downtime deployment strategies and implemented aggressive technical SEO, driving measurable organic traffic growth within months of launch.
- Handled authentication, billing logic, and multi-tenant architecture independently.

Academic Management System — SIAKAD / Gradehub

Back-End Developer

- Architected and developed 30+ RESTful API endpoints using **NestJS** for a comprehensive school management system covering student records, grading, and attendance.
- Collaborated with a multi-person dev team using structured GitHub flow: feature branching, PR reviews, and semantic versioning.
- Designed database schema and integrated **TypeORM** for data persistence and migrations.

AI-Powered Workflow & Automation Systems

Automation Developer

- Designed and deployed automated operational pipelines using **n8n**, integrating 3rd-party APIs (webhooks, REST) for seamless cross-platform data processing.
- Set up and configured **local LLMs** (on-premise) with OpenClaw for secure AI-assisted workflows — no external API dependency.
- Engineered custom **Python automation bots** handling scheduled tasks, data scraping, and AI tool integration to reduce manual ops overhead.

OSINT Investigation Bots — Gaza-Intel-Agent & MegaBot

Lead Developer

- Built two Telegram-based OSINT bots using **Playwright, Sherlock, and Python**, enabling automated digital investigation workflows through a chat interface.
- Deployed and maintained on a resource-constrained 2GB Ubuntu VPS using **PM2** and foundational Docker containerization, handling concurrent user sessions.

Business Platforms — bestkacafilm.com & pusdiklatisalam.web.id

Full-Stack Developer

- Delivered two production-grade institutional and commercial websites with responsive layouts, SEO-optimized markup, and fast load performance.

Dual-Mode Automated Trading Bot

Back-End Developer

- Built a Python trading script tracking NVDA and BTC/USDT with RSI-based signal detection; backtested against historical market data for signal validation.

TECHNICAL SKILLS

Languages	JavaScript, TypeScript, Python, PHP, SQL, HTML/CSS
Frameworks	NestJS, Next.js, Node.js, Express.js, Laravel
Databases	PostgreSQL, MySQL, SQLite — via TypeORM / Eloquent ORM
AI & Automation	n8n, Local LLMs, Prompt Engineering, LLM Integration, Python Bots
DevOps	Linux VPS, Docker, GitHub (branching, PRs, CI), PM2, Nginx
APIs & Protocols	RESTful APIs, Webhooks, WebSocket, JWT Authentication
Cybersecurity	Ethical Hacking fundamentals, OSINT, SOC Operations, Playwright scraping
Other	SEO Optimization, Agile/collaborative workflows, Rapid Prototyping

WORK EXPERIENCE

PPQIT AL Mahir — Student Internship	Aug 2025 – Oct 2025
• Maintained IT infrastructure and contributed to internal software development projects. • Bridged theory and practice through hands-on work alongside senior technical staff.	

EDUCATION

PPQIT Al-Mahir, Boyolali, Central Java	Mar 2023 – Jun 2026
Intensive full-stack development & technology program at a technology-focused Islamic boarding school.	

CERTIFICATIONS

• Cybersecurity for Businesses – The Fundamental Edition • Cisco Networking Academy (Jan – Feb 2026) • Responsive Web Design — freeCodeCamp • Introduction to Dark Web & Basic Cyber Security • Introduction to Financial Literacy
